

Chemo & Biotherapy Record

Keep a record of the cancer treatments you receive. You may want to include supportive medications like growth factors and anti-nausea meds and make note of how they helped/ didn't help you. If you can keep track of the doses, it will be easier to access this information in the future. Make note if a dose needs to be adjusted and why, any major side effects and who prescribed the medication.

Medication Name	Dose & Route (IV, oral)	Date Rec'd	Prescribed By	Side Effects, Dose Changes, Notes
