Getting Cancer Treatment? Start Here!

Let our team help you get through it. While receiving cancer treatments, you may be searching for different information than when you were first diagnosed. This list includes some of the commonly searched information, but you can always use the search feature or use the drop-down menus above to find what you need!

A good place to start is learning a little bit about your type of cancer. This can help you better understand what is being recommended when you see oncology specialists. You will likely hear a whole new vocabulary of medical terms. You don't need to know it all—but knowing a little can go a long way. And don't ever be afraid to ask "what does that mean?" or "can you explain that again?" This is your health and care - the oncology team is there for you. Don't be nervous to ask about anything you are unsure of or struggling with.

**Cancer Treatment Information**

Information about the many treatments available for cancer. Some specifics regarding treatment that you might be looking for:

- **Chemotherapy or other Medications**: Use the Find My Cancer Drug tool at the top left of the page to search by the first letter of the medication (generic or brand name). These articles will help you learn how to take the medication, possible side effects, and tips for managing them.
- **Clinical Trials**: Find appropriate clinical trials in all areas of the US using our Clinical Trials Matching Tool.
- Looking for information about surgery for your cancer? Look under the cancer type and then look for the "treatment options" articles.
- The Cancer Treatment menu has sections on many different treatments.

**Side Effects**

Find information on managing the side effects of cancer and cancer treatment.

**Coping With Emotions & Practical, Day-to-Day Needs**
