

## Regimen Calendar: Colon (Capeox) - Bevacizumab, Oxaliplatin, and Capecitabine

This calendar is for patients receiving the medications Bevacizumab, Oxaliplatin, and Capecitabine for treatment of colon cancer. This treatment may also be called Capeox. This article contains 2 images that can be printed out and used as a resource during treatment.

## Medications in Capeox Regimen

The medications listed are part of your regimen and will be shown in the calendar. This will help you know the name of each medication in the regimen.

## Capeox Calendar

The calendar is shown below. Use the line next to each week to write the date. This will help you know when each medication will be given during your treatment. Ask your care team any questions you have about this regimen.
